### **DETAILED ACTION**

### Claim Rejections - 35 USC § 112

- The following is a quotation of the second paragraph of 35 U.S.C. 112:
   The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 2. Claims 1-39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 3. Regarding claims 1, 3, 26 and 28, the sentence "the inner diameter being in a range of n/6 to n/2 times the outer diameter or the inner diameter is n/4 times the outer diameter" renders the claim indefinite because it is unclear whether the "n" is a symbol, representing a number, Applicant should be disclosed in the specification and claims.
- 4. Regarding claim 15, the sentence "the inner diameter being n/4 times the outer diameter" renders the claim indefinite because it is unclear whether the "n" is a symbol, representing a number, Applicant should be disclosed in the specification and claims.

## Claim Rejections - 35 USC § 103

- 5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 6. Claims 1-4, 11-15, 22-29 and 36-39 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schantz (U.S. Patent No. 6,593,886).

Application/Control Number: 10/695,046

Art Unit: 2821

Schantz teaches in figures 9-12 an antenna comprising: a substrate [12]; an electrically conductive circular ring [14] on the substrate and having an outer diameter; the electrically conductive circular ring has at least one gap [19] therein; the substrate [12] comprises a dielectric material; a feed structure [18] to feed conductive circular ring; the feed structure [18] comprises a printed feed line (See col. 13, lines 34-43); the feed structure [18] comprises a coaxial feed line (See col. 13, lines 34-43).

Schantz teaches every features of the claimed invention, except for the outer diameter being less than 1/10 an operating wavelength; and the outer diameter is about 1/20<sup>th</sup> of the wavelength.

Regarding claims 1, 3, 15 and 26-27, the specific frequencies claimed are well within the level of ordinary skill because frequency scaling is routinely employed in the antenna device, wherein the frequencies of operation are chosen by artisan as needed in a particular application.

### Allowable Subject Matter

7. Claims 5-10, 16-21 and 30-35 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

### Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shih-Chao Chen whose telephone number is (571) 272-1819. The examiner can normally be reached on Monday-Friday from 7 AM to 4:30 PM, First Fri. off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don Wong can be reached on (571) 272-1834. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
